Computers for all

Currently 50% of French households have a, but most families do not. As from next January, they will have the chance to have a, complete with, internet, and home for only 1 a day for 3

The desire to see more people both at and at using the is a key part of plans to see more government services delivered and to provide to all parts of the country.

The move follows the of a similar scheme for students which saw their computer usage immediately from 8 to 29%.
